

The Problem: Researchers invest heavily in producing important knowledge for the benefit of the public. Yet much of it is inaccessible - hidden behind academic paywalls, disguised by dense disciplinary jargon, beholden to the whims of social media platforms, or subject to URL hosting fees.

The Solution: A static web-page free to create and use that doesn't require any login procedures or other disincentives to access.

- ▶ Uses exclusively open source software to create a free, easy to use, integrated workflow.
- ▶ Produces a visually engaging, highly responsive web-page.
- ▶ The perfect platform to share your research with the world.
